

NOME: Ana Crisley Lima Martins

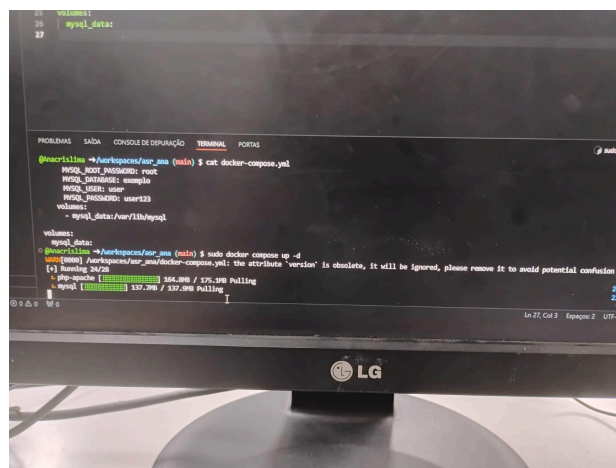

DOCKER COMPOSE

A terminal window showing the configuration of a Docker Compose file. The user is in a directory named `workspaces/asr_ana` and has run `cat docker-compose.yml`. The output shows the configuration for a MySQL database and a PHP application. The MySQL service is named `mysql` and uses the `mysql_data` volume. The PHP service is named `php-apache` and uses the `mysql_data` volume. The user has also run `sudo docker compose up -d` to start the services.

```
PROBLEMAS SAÍDA CONSOLE DE DEBURAÇÃO TERMINAL PORTAS
@Anacrislima → /workspaces/asr_ana (main) $ cat docker-compose.yml
MYSQL_ROOT_PASSWORD: root
